OWASP China 2013
Internet Security Technology Innovation and Development Forum

## Beijing   Shanghai   Guangzhou

Open Web Application Security Project (OWASP) is an open-source, not-for-profit application security organization made up of corporations, educational organizations, and individuals from around the world. Providing free, vendor-neutral, practical, cost-effective application security guidance, the organization is the de-facto standards body for web application security used by developers and organizations globally.

OWASP China has successfully hosted 4 years events and attracted about **3000** attendees from all over the world.
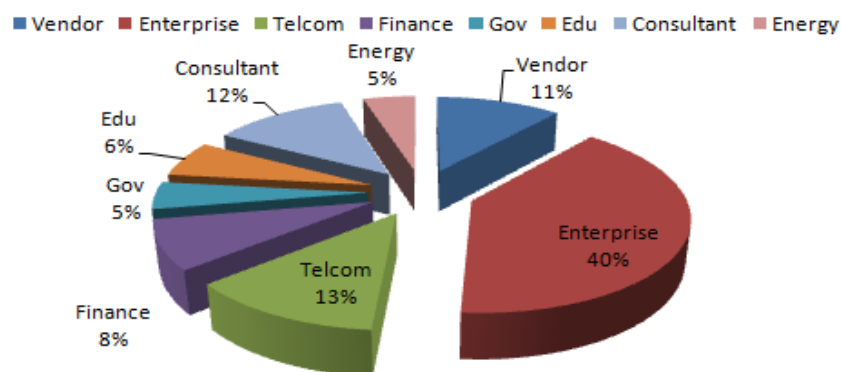

2013

OWASP China will organize the **OWASP China 2013 Internet Security Technology Innovation and Development Forum** in **Beijing, Shanghai and Guangzhou**, with about **1500** attendees from government, financial, telecoms, Energy, internet corporate, security vendors, education, and many other verticals.
