Achievements with my team

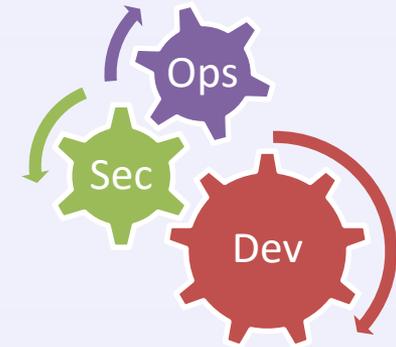

Hewlett Packard Enterprise

Benefits
Complying with ISO/IEC 27034-1 standard, allows (ITOM & ADM) to move forward with software security maturity program, protecting customer assets and providing better protection against potential cyber breaches targeted to our customers.

HPE Software is the first to achieve ISO/IEC 27034-1 security certification

Providing better response to today's cyber security threats while complying with the industry's most advanced Application Security Standards

HPE Software ITOM (IT Operations Management) and ADM (Application Delivery Management) business units recently expanded its ISO/IEC 27001:2013 certification to include the "DE-FACTO" standard for Application Security: ISO/IEC 27034-1. By certifying to ISO/IEC 27034 Software demonstrated compliance with the industry most advanced and demanding application security standard.
